Functionality in Emergency Situations:

Pursuant to 47 C.F.R. § 54.313(a)(6) and 47 C.F.R § 54.22(b)(4) as set forth in 47 C.F.R. § 54.202(a)(2) Texas RSA 3 Limited Partnership ("Plateau") meets the requirements to remain functional in emergency situations and has the following capabilities: Back-up power is provided to Plateau's MSOs by use of generators and batteries that provide a minimum of 8 hours emergency power. In addition, Plateau's towers have been equipped with a combination of generators and batteries that provide a minimum of 8 hours of emergency power with capabilities in many locations to remain operational for up to 20 hours on emergency power.

Plateau has fiber optics deployed to many of its towers and in addition has redundant fiber optic paths from its core switching network allowing Plateau the capabilities to reroute traffic in emergency situations. Plateau has properly prepared itself for any network outages by having redundant and diverse routing in place to manage any outages and has also purchased sufficient replacement parts for its core network equipment to ensure a reliable network. For added security, reliability, and connectivity in emergency situations, Plateau has interconnection with the LATA tandem, other local exchange carriers and other wireless carriers. For added emergency functionality, Plateau has two Cell-on-Wheel ("COW") mobile towers. These COWs allow Plateau to quickly respond to emergency situations, including network outages.

Lastly, Plateau has developed network preparedness plans in case of emergency situations. Plateau has sufficient capacity within its switching network to handle call spikes in emergency situations and its staff has been sufficiently trained on those preparedness plans to minimize any and all outages during emergency situations.
